 Development & Design

Red/Green/Refactoring

DEMO

Что дает TDD

- •Простой дизайн
- •Всегда работающий код
- •Маленькие шаги
- •Видно «плохой» дизайн
- •Тесты

Методология дизаина

Польза

- Описание системы
- Баги
- Дебағ
- Тупняк
- Прогресс

- •Понятный код
- Маленькие шаги

Нельзя просто так взять и быстро написать хороший код!

```
#1 fsomevar = f_GET['somevar'];
02 //nonywwnw? teneps Bot Tax
03 if($somevar == 1)($somevar = 15:)
UA 1f($somevar == 2){$somevar = 20;
05.1f(\$somevar == 3)\{\$somevar = 25;
06 lf($somevar == 4)($somevar = 30;
07 1f($somevar == 5)($somevar = 35:
08 if($somevar == 6)($somevar = 40;
If($somevar == 7)($somevar = 45;
10 If($somevar == 8)($somevar = 50;)
12 //пропустим неважное
14 Soutput .=''. Ssomevar.'';
16 //пропустим неважное
10 //а теперь обратно
19 if($somevar){
           if($somevar == 15){$somevar = 1;
           if($somevar == 20)($somevar = 2;
           if($somevar == 25)($somevar = 3)
           1f($somevar == 38)($somevar = 4
           if(ssomevar == 35)(ssomevar = 5
           1f($somevar == 40)($somevar = 6)
           if(ssomevar on 45)(ssomevar = 7)
           if($somevar == 50)($somevar = 8;)
```

Можно!
